ANPR SYSTEM

Plate Recognition

Softgen distributes innovative product based on artificial intelligence, which detects state registration plates of vehicles using modern technologies.

The flexible functionality of the system allows the user to manage information flows and sort according to current needs, to receive only the necessary information within the scope of his duties

SOFTGEN GROUP

ANPR SYSTEM

Plate Recognition

❖ The software controls the flow of vehicles in the area

❖ Counts the number of vehicles and their presence in the area

❖ Creates reports via various filters and automatically manages executable devices (modules)

ANPR SYSTEM

Plate Recognition

The plate identification system can be successfully introduced in restricted parking zones, where it is necessary to record the entry of "outside" vehicles, such as service centres, as well as in car washes, garage complexes and more.

The system is easily integrated with any other stand-alone surveillance camera system and has a number of automated functionalities, e.g.

❖ Issuance of automatic fines when the driver violates the driving rules in the area covered by the plate recognition cameras

❖ Immediately inform the initiator about the recognition of the desired car (by comparing it with the plate database)

ANPR SYSTEM
Plate Recognition

With assistance of plate recognition system it is possible to configure access levels and create action areas in which only certain types of transport will be allowed.

Differentiation of special equipment, municipal road transport and taxis is carried out in the process of vehicle flow management, in particular :

✓ Ambulance

✓ Fire Truck

✓ Patrol Vehicle

✓ Etc.
