- ✓ More than 150 partners in both the private and public sectors
- ✓ Softgen team consists of more than 50 highly qualified professionals

FOOD DELIVERY on-line sales system

Food delivery - the system includes a complete process, from receiving the order, including on-line payments, as well as the working environment of the customer, courier and food facilities

Other categories of objects (for example, online sales of building materials, clothing, stationery, etc.), as well as their websites and product listings, can be integrated into the system

The system is compatible with any type of device (website, app for Android and iOS)

Functionality of system applications

(WEB, Android, iOS)

- ↓ Easy access to the menu of various food facilities
- ↓ Ingredient selection and management (adding, removing)
- ↓ Order delivery/receive
- ↓ Online monitoring information about the current status of the order and the movement of the courier

Managing tools for the restaurants

Administering tools for food facilities included in the system (using both web and mobile applications):

- I. Menu management - arranging an assortment of orders
- II. Pricing - by the dishes, as well as by individual ingredients / additives
- III. Reception and notification of the order - both for the courier and for the customer (about the readiness of order)
- IV. Management of working hours (hours for ordering) (allowed intervals for ordering)

Courier management

The system automatically distributes between couriers:

- ❖ Orders
- ❖ Addresses (by districts)
- ❖ Funds

Courier App

Through the mobile application, the courier can receive:

- ❖ Orders
- ❖ Map (indicating the access road to the client)
- ❖ Information about generated profit
